

First Aid Tips For The Lazy

	Symptoms	Treatment
Appendicitis	Pain in right lower abdomen. Nausea, possible vomiting and fever.	Who cares? It's a vestigial organ anyway. Give him an aspirin.
Burns and Scalds	Redness, mild swelling, and pain. Blisters may develop.	Peel away dead skin. Rub vigorously to encourage good circulation.
Convulsion	Strong, jerking movements; stiff body. Difficulty breathing. Bluish face. Eyes rolled back, gritting of teeth, frothy mouth.	Sit on victim. Laugh at him until he gets embarrassed and stops.
Croup	Noisy, difficult breathing. Hoarse, barking cough.	Stuff a sock in victim's mouth.
Cuts and Bruises	Cuts bleed and hurt. Bruises get red, swollen, and hurt.	Call victim a sissy and send him back out to play
Dog Bite	Redness, swelling and bleeding if skin is broken. Fear of the dog.	Scold victim. Shoot dog.
Drowning	Unconscious, pale or blue skin.	Talk about what a great guy he was.
Earache	Pain. Possible dizziness or discharge from ear. Possible fever.	Listen to one hour of country music. THEN you'll know what what an earache is.
Fainting	Pale, clammy skin, dizziness, shallow breathing, sweating and temporary unconsciousness.	Before victim revives, take his wallet and clothes and put him on a bus to Toledo.
Fever	Body temperature over 98.6 degrees F (37 C). Hot forehead.	Administer 4 oz. of 'Old Jayhawk' [cheap whiskey] every 2 hours.
Frostbite	Skin flushed, then changing to white or greyish yellow. Blister may appear. Cold and numb. Pain.	Submerge in boiling water.
Heat Exhaustion	High temperature. Pale and clammy skin, or hot and flushed skin. Headache and weakness. Possible nausea.	Lock up victim in walk-in freezer for 1-2 hours.

Insect Bites and Stings	Pain and redness at the site of the sting or bite. Possible allergic reactions such as shock or difficulty breathing.	Capture insect and mash to paste. Dissolve in one cup of milk and have victim drink.
Nosebleed	Profuse bleeding from the nose.	Apply tourniquet to victim's neck.
Poisoning	Symptoms vary. Throat or stomach pains. Mouth burns. Vomiting. Drowsiness.	Give 1 tbsp lye in ammonia solution to flush system.
Shock	Victim pale and weak. Clammy skin, perspiration on upper lip and forehead. Pulse rate and breathing rate are increased.	Grasp victim firmly by the shoulders and shake, shouting, "Snap out of it!"
Stroke	Unconscious. Heavy breathing. Apparent weakness in face or limbs on one side of body. Inability to speak.	Kiss patient goodbye. It's all over.
Sunburn	Redness, mild swelling, and pain. Possible blisters.	Remove reddened skin with sandpaper. Soak affected area in alcohol.
Swallowing Foreign Bodies	Dangerous when in air passages. Violent coughing and choking. Bluish facial discoloration. Breathing may stop.	Shout, "Hey, dumbshit, spit that out! Whatsa matter with you!"
Toothache	Pain. Tooth is sensitive to hot and cold food and fluids.	Alternate administration of hot coffee and ice cream.
